

1200 & 2000 Amp Power Distribution & Controls Cabinets

The PWRvance Advantage

High Amperage Power Distribution

- Available in 800 Amps-2,000 Amps.
- An aesthetically pleasing solution without external strut and wiring.
- Enclosures are UL-Listed and NEMA 3R rated.
- Customizable power distribution to suit your unique needs.
- Faster installation time.
- Capability for cold sequencing.
- Features a separate and secure CT compartment with available metering options.
- Internal transformers for dual voltage sites.

Bringing the PWRvance Advantage

- Project planning provides shorter lead times.
- PWRvance services can be integrated within any phase of the management cycle.
- Direct support for utility-specific requirements.
- Designs are NEVI-ready.

PWRvANCE

INNOVATION BY MILBANK®

Power Distribution & Controls Redefined

Power Distribution

Effectively manage your electrical power distribution with PWRvance. We're leveraging almost a century of innovation and manufacturing you can trust to modernize your power distribution solution. Achieve maximum functionality in a more affordable package with a reduced footprint, a sleeker aesthetic, and safer installation.

Built with Purpose

Rethink power distribution and controls with PWRvance power distribution and controls cabinets. Our purpose-built and tailor-made power distribution and controls solutions are engineered according to your specific project needs. The next generation of power distribution and controls are here.

EV Power Solutions

PWRvance is producing custom power distribution solutions to streamline electric vehicle charging. We're supporting the exponentially growing need for EV-supporting infrastructure with products that provide an attractive, secure and efficient result.
