

Meter Main Pedestals

U6220, U6221 & U6226 Series

U6434, U6435 & U6436 Series

U6221 installation in Gambills, Maryland.

Potential Applications

Mobile home park needs power distribution with more receptacles.

Ideal for **mobile homes or RV parks** that have a need for more branch circuits. The U6221 has a slender footprint and offers a defined wireway for the utility line side wire, separate from the end user side. These loads are each metered individually by the local utility.

DOT needs compact power distribution.

A **Department of Transportation (DOT)** was looking for a solution to distribute power to their traffic lights and signals. Milbank and a local rep worked with the DOT and a local utility to provide a more compact solution.

Small commercial business needs freestanding single-tenant power distribution.

Milbank offers several types of meters and meter mains for **commercial businesses**. The U6221 is ideal for a small, freestanding business that may need to distribute power to external lighting or signs.

Please consult serving utility for their requirements prior to ordering or installing, as specifications and approvals vary by utility, and may require local electrical inspector approval. All installations must be installed by a licensed electrician and must comply with all national and local codes, laws and regulations. Milbank reserves the right to make changes in specifications and features shown without notice or obligation.

Meter Main Pedestals

U6220, U6221 & U6226 Series
