Milbank Overview

Energy At Work Since 1927

Milbank designs and manufactures electrical solutions that move and manage power for the residential, commercial, industrial, utility and transportation sectors. With nearly a century of expertise in electrical engineering design and manufacturing, Milbank's portfolio includes metering equipment, enclosures and enclosed controls. Founded in 1927, Milbank is a family-owned, American manufacturer headquartered in Kansas City, Mo. For more information, please visit milbankworks.com.

Metering

Milbank has been a market leader in electrical metering equipment, setting the standard in quality, for 95 years and counting. There are hundreds of available configurations, including a range of sizes as well as various knockout, terminals and bypass options. Products also have a variety of selections for hubs, locks and connectors. Milbank has the socket you need with thousands of active products to meet your utility's requirements.

Enclosures

Milbank's line of enclosures include commercial junction boxes, panel mount enclosures, transformer cabinets, wireways and troughs. Enclosures are designed to meet or exceed industry standards. Each one is constructed with high-quality materials and built with superior craftsmanship. Each unit is engineered to protect controls and equipment from dust, dirt and other harmful elements, based on various NEMA ratings.

Enclosed Controls

Milbank doesn't just build empty enclosures, we can design and craft the entire package. Our enclosed controls are custom control equipment, engineered and built to your exact specifications. Milbank enclosed controls are an attractive, secure, easy-to-install and cost-effective solution. These units can replace unsightly and insufficient strut and backboard structures when underground remote site power distribution and control equipment is required.

Please consult serving utility for their requirements prior to ordering or installing, as specifications and approvals vary by utility, and may require local electrical inspector approval. All installations must be installed by a licensed electrician and must comply with all national and local codes, laws and regulations. Milbank reserves the right to make changes in specifications and features shown without notice or obligation.

Air Conditioner Disconnects

30 and 60 Amps AC Disconnects	6

Air Conditioner Disconnects

30 and 60 Amps | Fusible and Non-Fusible

U3802

U3812

U3832

Milbank's air conditioner disconnect features a removable hinged cover for easy installation. Our compact design meets NEC wiring space requirements and also complies with NEC Article 440-14. To ensure safe working conditions, our disconnect pullers can be removed and reinstalled in the OFF position. Additionally, padlock provisions are included on the front cover. Like other Milbank products, our enclosure is constructed of G90 galvanized steel and electrostatically finished with an attractive, light gray baked powder coating. Our epoxy/polyester resin blend provides a durable and fade-resistant finish.

30–60 Amps | 1Ø 240V | Air Conditioner Disconnects

Catalog Number	Amps	Type	Max H.P.	Weight (lbs.)	Line/Load Wire Range		Ground Wire Range CU/AL	Dimensions			Wire Rating

Air Conditioner Disconnects

7

20 Amps GFCI Receptacle

U3822-20GWR

Specifications

- Meets NEC #210.63 requirements
- UL-listed as Power Outlet
- Type 3R enclosure
- In-use cover*
- Duplex ground connector
- One-inch concentric knockouts
- 1Ø, 240V
- 60 Amps, non-fused
- 20 Amps GFCI receptacle
- Reset/test button
- Weather and tamper resistant
- Meets NEC #406.8 requirements

60 Amps | 1Ø, 240V | Air Conditioner Disconnect with GFCI Receptacle

Catalog Number	Type	Max H.P.	Weight (lbs.)	Line/Load Wire Range		Ground Wire Range CU/AL	Dimensions			Wire Rating	
				CU	AL		D"	W"	H"	CU °C	AL °C

Notes

- **Disconnect pullers:** To ensure the safest conditions, Milbank disconnect pullers are reversible so they may be reinstalled in the OFF position.
- **Padlock provision:** All units are designed with a padlock provision on the cover for security.
- ***In-use cover:** Cover is rated as an in-use cover (cover may be closed with cords plugged into receptacle).

Please consult serving utility for their requirements prior to ordering or installing, as specifications and approvals vary by utility, and may require local electrical inspector approval. All installations must be installed by a licensed electrician and must comply with all national and local codes, laws and regulations. Milbank reserves the right to make changes in specifications and features shown without notice or obligation.

Hot Tub Disconnect

Type 3R Enclosures

U4881-O-50GB

U4881-O-60GB

Specifications

- 240V ground fault protection
 - UL-listed, Type 3R weather-resistant
 - Two-pole, 50 Amps GFCI breaker protection
 - Compact size
 - Three or four wire installation
- 1Ø, 120/240V
 - Standard package of 12
 - Two extra one-pole breaker spaces
 - 100 Amps overall rating
 - Easy to install

Notes

- **Ampere Rating:** 80 Amps continuous.
- **Max Amps Rating:** 100 Amps.
- **Fifth and sixth terminals:** For factory installation contact your local Milbank Manufacturer's Representative.
- **Sealing ring:** Supplied with a snap-action sealing ring.
- **Hub:** Units supplied with cast in hub on top and bottom. Contact factory for availability of other hub sizes.
- ***Bypass:** Available with auto bypass.

Please consult serving utility for their requirements prior to ordering or installing, as specifications and approvals vary by utility, and may require local electrical inspector approval. All installations must be installed by a licensed electrician and must comply with all national and local codes, laws and regulations. Milbank reserves the right to make changes in specifications and features shown without notice or obligation.

Notes

- **Hubs:** For proper hub selection see the hub suffix chart on the accessories page.
- **Fifth terminal:** For field-mounted fifth terminal, order catalog number **K5T** to fit into square opening at the 9 o'clock position.
- **Connectors:** Units with **-TG** suffix include triplex ground connector.
- ***Bypass:** The horn-type bypass is factory-installed (suffix **-KK**). This permits changing and testing of the meter without interrupting customer service when used with utility-supplied jumpers.
- **Side wireway.

Please consult serving utility for their requirements prior to ordering or installing, as specifications and approvals vary by utility, and may require local electrical inspector approval. All installations must be installed by a licensed electrician and must comply with all national and local codes, laws and regulations. Milbank reserves the right to make changes in specifications and features shown without notice or obligation.

Notes

- **Hubs:** The -X unit is supplied with a large closing plate in the top. The -XT units are supplied with two large closing plates in the top. For proper hub selection, see the hub suffix chart on the accessories page.
- **Connectors:** K-4 units require a total of five connectors. K-7 units require a total of eight connectors. The K-7 units are supplied with two ground lugs. Order line and load connectors as extra.
- **Isolated Neutral Kit:** To add isolated neutral kit to K-7 sockets, use catalog number Z708312-MO.
- **Aluminum Construction:** This unit is constructed of aluminum.

Please consult serving utility for their requirements prior to ordering or installing, as specifications and approvals vary by utility, and may require local electrical inspector approval. All installations must be installed by a licensed electrician and must comply with all national and local codes, laws and regulations. Milbank reserves the right to make changes in specifications and features shown without notice or obligation.

Bolt-on type lugs for Milbank stud-type meter mounting devices are constructed from 6061-T6 aluminum, ensuring both high strength and high conductivity. All lugs are tin-plated to minimize contact resistance and prevent corrosion. Additionally, Allen or hex head pressure screws are included to facilitate optimal conductor spread, maximizing binding action with the lug.

Notes

- **NEC 2020 Compliant:** All products are NEC 2020 compliant.
- **Knockouts:** See drawings on the next page.
- **AIC Rating:** All models are rated 22K AIC. However, this rating is limited to the lowest interrupting capacity of any circuit breaker installed. Watthour meter not included in short circuit current rating.
- **Hub:** Units supplied with one closing plate. Order hubs separately, see accessory page.
- **Fifth Terminal:** For field-installed fifth terminal, order **K5T**.
- **Connectors:** Socket is supplied with 3/8" - 16 hex head nuts with Belleville washers. For connector lug kits, order as extra from chart on page 66. Separate lug kits are required for line and load.

Please consult serving utility for their requirements prior to ordering or installing, as specifications and approvals vary by utility, and may require local electrical inspector approval. All installations must be installed by a licensed electrician and must comply with all national and local codes, laws and regulations. Notes

- **Hubs:** For proper hub selection, see the hub suffix chart on the accessories page.
- **Prewiring:** If standard factory prewiring is required, refer to wiring diagrams in the reference section of this catalog. Determine appropriate diagram and send copy with order. If custom factory prewiring is required, contact factory for details. Be sure to include meter socket catalog number, test switch model and number, and meter form number. Please be sure to provide a copy of your wiring diagram.
- **Connectors:** Units are supplied with mechanical type connectors (#4 max). If compression type connectors (#10) are preferred, change catalog prefix to "U" (i.e. UC7445-XL becomes U7445-XL).
- **Test switch cover:** Units on this page are not designed for use with test switch covers without removing test switch bridge prior to installing test switch.
- ***Prewiring:** Both units in table are factory prewired. Picture shown does not illustrate prewiring option. Please contact your local Manufacturer's Representative for more information.

Please consult serving utility for their requirements prior to ordering or installing, as specifications and approvals vary by utility, and may require local electrical inspector approval. All installations must be installed by a licensed electrician and must comply with all national and local codes, laws and regulations. Milbank reserves the right to make changes in specifications and features shown without notice or obligation.

Current Transformer Cabinet

27

NEMA Type 3R

323215-TC3RXA-SP1

Features

- Standard CT Cabinets available.
- Available in sizes ranging from 36x30x10 to 60x60x10.
- Cabinets are made from .100 aluminum.
- CTCs provide protection against rain, sleet, snow and dripping water.
- The cover is mounted on galvanized lift-off hinges with stainless steel hinge pins.
- Cover is fastened with a padlockable draw latch.
- Comes with three-point padlockable handle.
- Panel-mounting studs provided for optional back panels.
- Drip shield top and seam-free sides, front and back.

Current Transformer Cabinet | Panel Enclosure

Catalog Number	Hub	Gauge Aluminum	Wood Back Panel	Dimensions		
				D"	W"	H"
323215-TC3RXA-SP1	Blank	.100	Installed	15	32	32

Please consult serving utility for their requirements prior to ordering or installing, as specifications and approvals vary by utility, and may require local electrical inspector approval. All installations must be installed by a licensed electrician and must comply with all national and local codes, laws and regulations. Milbank reserves the right to make changes in specifications and features shown without notice or obligation.

Features

- **Painted aluminum construction:** Enclosure shells are constructed with lightweight aluminum, making wall-mount installations easier. Powder coat paint finish helps prevent corrosion.
- **Capable of wall- or pad-mounting:** Units feature a removable bottom, allowing an easy conversion from a wall-mount to a pad-mount.
- **Smaller Footprint:** The **UAP6094** model has a more compact footprint compared with the leading competitor.
- **Comes with multi-port ground lugs.**
- **Penta bolt secured handle** (see pics below): Enclosure handle includes a penta bolt locking mechanism (see photos below) for enhanced protection.

U4908-O-100MB-11GR

**NEC 2020 COMPLIANT*

U4908-O-11GR

Specifications

- Available in ringless style (**U4908** series) or ring-type (**U4909** series).
- UL-listed 100 Amps, 120/240V – 1Ø Underground Service Power Outlet.
- Has a short circuit current withstand rating of 10,000 RMS symmetrical amperes.
- Type 3R welded enclosure for durable outdoor use.
- Enclosure constructed with galvanized 16-gauge steel.
- Powder coated with ASA 61 gray polyester finish.
- Convenient concentric knockout configurations and mounting embosses.
- Wire terminations accept copper or aluminum conductors:
 - Service-line and Neutral: One #6-2/0 load ground: two 1/0-#14 and four #6-#14.
 - Load Neutral: Two 1/0-#14 and four #6-#14 service ground: #2-#8.
- Six circuit-plated copper interior accepts standard plug-in type circuit breakers.
- Three position **self-grounded** receptacle bridge accepts most standard NEMA receptacles with mounting plates.
- Four terminals, ringless meter socket with stainless steel locking hasp. Ring-type socket has aluminum **MR-2** snap-action sealing ring.
- Lockable hinge cover and deadfront are removable for installation and maintenance. Stay-open hinge cover has safety interlock on deadfront. Deadfront must be removed before hinge cover can be removed.

Please consult serving utility for their requirements prior to ordering or installing, as specifications and approvals vary by utility, and may require local electrical inspector approval. All installations must be installed by a licensed electrician and must comply with all national and local codes, laws and regulations. Milbank reserves the right to make changes in specifications and features shown without notice or obligation.

Lighting Accessories

For Millennium Series Products

35

Internal Light Kits for **Metered** Power Outlets (U5100 and U5300)

Application	Internal light kit for metered power outlets.	
LED Features	Includes new LED light , lamp shield and opaque hinge cover lens. Factory-wired to 20 Amps GFI circuit. May be wired to separate 20 Amps circuit breaker. Order Q120 separately. Cover on metered power outlet is 15¼" in height.	
Ordering	Order with -LD suffix (after catalog number) for factory-installed. Order catalog number K6213 for field-installed.	

Application	Internal light kit for metered power outlets.	
Fluorescent Features	Includes five-watt fluorescent lamp socket, ballast, lamp shield and opaque hinge cover lens. Factory-wired to 20 Amps GFI circuit. May be wired to separate 20 Amps circuit breaker. Order Q120 separately. Cover on metered power outlet is 15¼" in height.	
Ordering	Order with -L suffix (after catalog number) for factory-installed. Order catalog number K5412 for field-installed.	

Photoelectric Light Control Kit

Application	Photoelectric light control kit for K5412 light kits.	
Features	2.5 Amps, 120V photo electrical control wired in series with K5412 light kits.	
Ordering	Order with -LPC suffix for factory-installed light and PE control. Order catalog number K5413 for field-installed.	

WARNING!

Always disconnect power prior to installing these devices.

Please consult serving utility for their requirements prior to ordering or installing, as specifications and approvals vary by utility, and may require local electrical inspector approval. All installations must be installed by a licensed electrician and must comply with all national and local codes, laws and regulations. Milbank reserves the right to make changes in specifications and features shown without notice or obligation.

Telephone and Cable TV Kit

Application	Mounts to rear of pedestal series U5200 and U5300. May also be adaptable to a wooden or similar structure.	 K4709-02-3R K4709-02
Features	<p>Single: 16" galvanized raceway, (one) RJ11 telephone jack and (one) Type F coaxial CATV jack</p> <p>Dual: 16" galvanized raceway, (two) RJ11 telephone jacks and (one) Type F coaxial CATV jack</p> <p>Includes mounting hardware and instructions.</p>	
Ordering	Single line telephone and cable TV kit order K4709-02 .	
Note	Confirm acceptability with Cable TV and Telephone provider before ordering or installing these devices.	

Water Shroud with Hardware

Application	Used to cover water pipe and provide means to mount hose bib to rear of pedestal.	
Features	<p>Includes mounting hardware and instructions.</p> <p>Matches K4709 kits when mounted side-by-side.</p>	
Ordering	Order catalog number K4709-WS .	

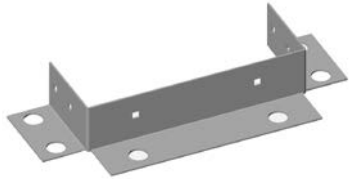

Please consult serving utility for their requirements prior to ordering or installing, as specifications and approvals vary by utility, and may require local electrical inspector approval. All installations must be installed by a licensed electrician and must comply with all national and local codes, laws and regulations. Milbank reserves the right to make changes in specifications and features shown without notice or obligation.

Pedestal Mounting Accessories

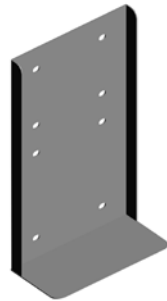

For Millennium Series Products

37

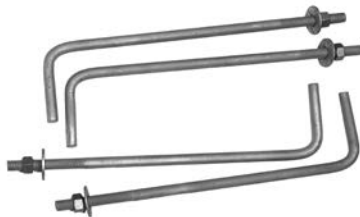

Field-Installed Pad-mount Kit

Application	Field-installed pad-mount kit with 6¾" mounting holes.	
Features	Includes ¼-20 stainless steel hardware to attach pad-mount base to post. Anchor bolt kit sold separately (order catalog number K5421).	
Ordering	Order catalog number K5410 .	

Stabilizer Foot with Hardware

Application	Stabilizes direct burial type posts in unstable soil conditions.	
Features	Includes ¼-20 hardware to attach to U5200 and U5300 pedestals.	
Ordering	Order catalog number K5415 .	

Anchor Bolt Kit

Application	Concrete anchor bolt kit designed to attach pad-mount base to concrete.	
Features	(Four) sets of zinc-plated ⅝-11 x 10" bolt with two-inch toe. Includes nut and flat washer.	
Ordering	Order catalog number K5421 .	

Please consult serving utility for their requirements prior to ordering or installing, as specifications and approvals vary by utility, and may require local electrical inspector approval. All installations must be installed by a licensed electrician and must comply with all national and local codes, laws and regulations. Milbank reserves the right to make changes in specifications and features shown without notice or obligation.

Field-Installed Meter Kits

Application	Field-installed meter kit for U5000 and U5200 power outlets.	
Features	100 Amps cast meter socket, CL200-D E-Z Read Meter, sealing ring, security seal, one-inch Milbank hub, nipple and mounting screws. See CL200-D for watthour meter specification.	
Ordering	Order catalog number K4800-D digital meter kit.	

E-Z Read Watthour Meter

Application	200 Amps E-Z read watthour meter designed to be field-installed on the U5100 and U5300 metered power outlets.	
Features	200 Amps form 2S 120/240V. Numeric readout in full kilowatt increments. No "tenths" dial. Analog and digital readout options. Remanufactured within 1% accuracy.	
Ordering	Order catalog number CL200-D .	

CL200-D

Single Receptacle Only Power Outlet

Application	Overhead/underground power outlet receptacle, suitable for RV, temporary service, campground, marina and boat yard equipment.			
Features	NEMA 3R, 120/240V single phase. Comes with lockable cover. Breaker not included in receptacle box.			
Ordering	Order catalog number from chart below.			
Receptacle Options	 P-10GWR 20A 5-20GR 120V GFI	 P-13 30A TT-30R 120V	 P-54 50A 14-50R 120/240V

600/1200 Amps | Pad-mounted Panelboard

Specifications

- 600 to 1200 Amps, 120/240V, 1Ø distribution bus accepts up to up to six, two-pole, 200 Amps circuit breakers. Order from chart below.
- Costly main breaker not required per NEC 230-71.
- Economical alternative to costly wall-hung or strut-mounted panelboards and load centers.
- Low-profile, aesthetic design can be located near utility transformers or fed from a main service to a convenient location.
- Pad-mounted NEMA 3R powder coated aluminum enclosure – standard color is gray.
- Hinge door and lift-off rear service door are lockable and sealable for security.

NOTE: Contact local code enforcement for pad size requirements. Order catalog number **CP-24-PDMNT-CALT** pad-mount base or catalog number **CP-ABK5/8** anchor bolt kit separately.

Specifications

- Built in accordance with NEMA, ASA and AIEEE standards. Designed and tested to withstand 150% of rated load for two continuous hours. Contact local utility for acceptance of this product.
- Integrated design of the enclosure, core and coil, and secondary distribution panel permits convenient vertical line and load terminations.
- Primary and/or secondary main circuit breaker protection available. Contact local utility for 480V overcurrent protection requirements. Single fuse primary overcurrent protection provided on 2400V and above units.
- Other primary voltages available: 4160, 4800, 7200, 7960, and 12,470. Contact factory. Not UL-listed.

Core and Coil

- Aluminum wound (copper available)
- Standard voltage taps at 2FCAN and 4FCBN
- Rated at 150° C temperature rise

Distribution Bus

- 1600 Amps tin-plated aluminum
- Space available for up to (12) circuit breakers – 1600 Amps maximum
- Uses Milbank type UQFP-100 through 200 Amps circuit breakers

Enclosure

- Type 3R enclosure
- Powder coated galvanized steel (aluminum available)
- Lockable primary and secondary doors
- Lifting hooks and fork lift slots provided

Please consult serving utility for their requirements prior to ordering or installing, as specifications and approvals vary by utility, and may require local electrical inspector approval. All installations must be installed by a licensed electrician and must comply with all national and local codes, laws and regulations. Milbank reserves the right to make changes in specifications and features shown without notice or obligation.

Milbank enclosed controls provide a superior alternative to unsightly and inefficient strut and backboard structures. These enclosed controls offer an appealing, secure and cost-effective solution for underground remote site power distribution. The weather-resistant cabinets can be tailored to fit any environment, with a range of mounting options at your disposal. Each unit includes a utility pull section, complete with an optional meter socket, and a separate customer section equipped with distribution and control equipment.

Strut and Backboard

Commercial Pedestal

UL-listed as Industrial Control Equipment (File E113855)

Standard Features

- Type 3R rain-resistant and vandal-resistant cabinet of polyurethane powder coated steel (aluminum or stainless steel also available).
- UL-listed as enclosed industrial control equipment (UL508A).
- Isolated lockable and sealable utility metering and lug landing sections.
- Lockable customer section for distribution and control equipment with internal deadfront.
- Print pocket inside customer section door contains wiring schematics and installation instructions.
- Load centers are UL-listed for use with various manufacturers' circuit breakers.
- All stainless steel external hardware (screws, bolts, hinges, handles, hasps and sealing screws).

Please consult serving utility for their requirements prior to ordering or installing, as specifications and approvals vary by utility, and may require local electrical inspector approval. All installations must be installed by a licensed electrician and must comply with all national and local codes, laws and regulations. Milbank reserves the right to make changes in specifications and features shown without notice or obligation.

Enclosed Controls

Attractive | Easy to Install | Secure | Cost-Effective

Applications

These units are ideal for controlling and metering:

- Traffic signals
- Street lighting
- Power distribution for electric vehicle charging stations
- Communication equipment such as cell towers and telecom vaults
- Event power for fairgrounds, swap meets, outdoor markets, portable offices, holiday lights, etc.
- Outdoor lighting for athletic fields, tennis and basketball courts, parking lots, landscaping and subdivision entrances, etc.

Available Factory-Installed Options

- Meter sockets: ring-type or ringless, up to 400 Amps
- Main and branch breakers or T fuses
- Distribution: copper load centers and panelboards
- Clocks, timers and relays
- Photoelectric cells and controls
- Various power receptacles: pin and sleeve, twist lock or straight blade
- Contactors: lighting, definite purpose, motor starters
- Surge protection and lightning arrestors
- Generator inlets with interlocked breakers
- Push button controls
- Thermostat controls, fans and heating strips
- Power blocks and terminal blocks
- Steel, aluminum and plywood backboards
- Transformers
- Interlock devices for circuit breakers

Options

- Available in steel, aluminum (raw painted or anodized) or stainless steel construction with powder coated finish available in eight standard colors or special-ordered RAL colors.
- Available for applications up to 400 Amps, 120V, 208V, 240V, 277V, 480V - 1Ø or 3Ø.

Accessories

Pad-mount bases available for all pedestal sizes, inquire with your representative for details.

Please consult serving utility for their requirements prior to ordering or installing, as specifications and approvals vary by utility, and may require local electrical inspector approval. All installations must be installed by a licensed electrician and must comply with all national and local codes, laws and regulations. Milbank reserves the right to make changes in specifications and features shown without notice or obligation.

Main Load Center Commercial Pedestal

1Ø3 wire 120/240V or 208Y/120V

Application: remote site service for multiple loads.

Milbank Main Load Center Commercial Pedestals are designed to handle the vast majority of all requirements in a standard, stocked configuration.

- All units feature a load center with a plug-on, back-fed main breaker.
- Standard units are equipped with a 16-circuit load center in the 100 Amps or 24 circuit load center in 200 Amps models.
- Sub-feed lugs to allow feeding an external panel.

If your application requires a "dusk-to-dawn" feature, see the Milbank Switched Load Center Commercial Pedestal products page.

Features

These units include everything required for remote site service:

- Expandable load centers allow future expansion without costly modifications.
- All units feature a 200 Amps meter socket with optional field-installable fifth terminal kit available.
- Amps interrupting capacity (AIC) standard is 22K.
- Optional mounting base can be embedded in concrete for fast, easy installation.
- Separate sealable and lockable utility termination section.
- Separate sealable and lockable metering section.
- Separate sealable and lockable customer section with a load center for "always on" loads that include a main circuit breaker, 20 (125 or 200 Amps model) or 14 (100 Amps model) blank breaker spaces and a circuit directory to document configuration.

Please consult serving utility for their requirements prior to ordering or installing, as specifications and approvals vary by utility, and may require local electrical inspector approval. All installations must be installed by a licensed electrician and must comply with all national and local codes, laws and regulations. Milbank reserves the right to make changes in specifications and features shown without notice or obligation.

Switched Load Center Commercial Pedestals

1Ø3 wire 120/240V or 208Y/120V

Designed to provide power for various loads and switch specific loads on/off under certain conditions. A photoelectric cell is used for these controlled loads with an available optional time clock.

Features

These units include everything required for remote site service:

- Load centers are expandable. They allow future expansion without costly modifications.
- All units feature a 200 Amps meter socket with optional field-installable fifth terminal kit available.
- Amps interrupting capacity (AIC) standard is 22K.
- Optional mounting base can be embedded in concrete for fast, easy installation.
- Separate sealable and lockable utility termination section.
- Separate sealable and lockable metering section.
- Separate sealable and lockable customer section with a control circuit including:
 - PE receptacle
 - Lexan® window
 - Glare shield
 - Hand-Off-Auto (HOA) switch
 - Contractor controlling a 16-circuit load center for controlled loads
 - A pre-mounted DIN rail and pre-wired connector to add an optional "plug-and-play" time clock kit for PE on and TC off operation and a circuit directory to document configuration.
- A load center for "always on" loads that includes a main circuit breaker, a control power circuit breaker, a switched load center main breaker, nine (125 or 200 Amps model) or 11 (100 Amps model) blank breaker spaces and a circuit directory to document configuration.

Enclosed Controls

400 Amps Commercial Pedestals

Pedestals are designed to provide a weather- and vandal- resistant metered enclosure for various loads and distribution. Each pedestal is designed to handle a wide range of applications using standard and stocked configurations.

- Available in single main breaker or twin service disconnect breakers, allowing for flexibility within the design.
- Optional distribution with feed-through lugs below the service disconnect breakers allows the pedestal to handle numerous applications.
- Typical applications include remote homes where the metering is best located at the curb side or other remote area. The pedestal can also provide power to secondary residence, on-site business, workshop, irrigation, lighting, security or other secondary load.

Features

These units include everything required for remote service:

- Available with main circuit breaker or dual service disconnects.
- Load centers are expandable. They allow future expansion without costly modifications.
- Optional mounting base can be embedded in concrete for fast, easy installation.
- Separate sealable and lockable utility termination section with lug termination.
- Separate sealable and lockable metering section.
- Separate customer section with a circuit directory and print pocket, also sealable and lockable.
- Meter socket options include ring-type with bypass studs, ringless with heavy duty lever bypass, or K-Type bolt-on.

Applications

**Commercial
Job Sites**

Remote Site

Please consult serving utility for their requirements prior to ordering or installing, as specifications and approvals vary by utility, and may require local electrical inspector approval. All installations must be installed by a licensed electrician and must comply with all national and local codes, laws and regulations. Milbank reserves the right to make changes in specifications and features shown without notice or obligation.

Enclosed Controls

Surface-Mount Compact Design

49

Surface-Mount Commercial Pedestal

Surface-mount enclosed controls offer the flexibility of larger EC products but don't take up as much space. While these commercial pedestals have a smaller footprint, they are still available with several mounting options.

Features

- Crafted for a faster, simplified installation process.
- Designed with both overhead and underground entry and exit, all in one unit.
- Both the meter and components are located in one enclosure.
- Meter and components in one enclosure
- UL508A and UL891:
 - Custom component configurations.
 - UL listing covers all internal components.
- Can be mounted on multiple surfaces:
 - Walls
 - Poles – narrow profile will have minimal extension past sides
 - H-Frames (Strut)
- Multiple bypass options available.
- Available with monitoring options.
- Powder coating available in standard Milbank EC colors or custom colors.

Benefits

- Smaller footprint
- Flood resistant
- No need for connecting components:
 - Wire-in
 - Wire-out

Please consult serving utility for their requirements prior to ordering or installing, as specifications and approvals vary by utility, and may require local electrical inspector approval. All installations must be installed by a licensed electrician and must comply with all national and local codes, laws and regulations. Milbank reserves the right to make changes in specifications and features shown without notice or obligation.

Designed to provide battery backup power for various loads and to switch specific loads on and off under certain conditions, such as a photoelectric cell or time clock controlling lighting circuits. Metered and unmetered power distribution options are available. The backup power pedestal is designed to meet the vast majority of today's backup power requirements. Utilizing a 19-inch rack design, shelves can be adjusted to accommodate the necessary batteries, manufactured DC to AC inverters, transfer switches and other related equipment. We offer complete turnkey, ready-to-power-up pedestals, as well as basic units ready to accept batteries and inverters supplied by others.

Features

- Available in 100 through 320 Amps meter socket with the option of either a ring-type socket (conforms to EUSERC 308) with or without test/bypass blocks or a heavy duty ringless socket with lever bypass. Separate sealable utility termination compartment.
- An isolated separate customer section with service disconnects, power distribution options and power control.
- Customer compartment comes with 19" wide rack for easy layout of equipment.
- Available with battery trays.
- Standard pedestals include thermostat with cooling fan.
- Filtered louvers provide heat rise flow through ventilation.
- Three point door latch is key or padlockable.

Note

- May require customization based on regional requirements.

Milbank reserves the right to make changes in specifications and features shown without notice or obligation.

Providing metered or unmetered AC power, distribution, surge suppression, mechanical interlock and stand-by generator receptacle — all in a neat, compact pedestal.

Features

- Available in 120/240V 1Ø3W through 277/480V 3Ø4W ratings.
- Units can be metered or unmetered.
- Choice of EUSERC ring-type or ringless meter sockets.
- Available in 60 through 400 Amps ratings.
- Isolated utility compartments are padlockable.
- GFCI convenience receptacle rated at 20 Amps.
- Recessed generator receptacle door is lockable.
- Options for utility and generator indicator lights.
- All hardware is stainless steel.
- Galvanized steel, aluminum or stainless steel cabinet options.
- Custom designs available.

Note

- May require customization based on regional requirements

CT metered commercial pedestals are designed for use where a smaller service package is a better option, as opposed to larger switchgear equipment.

Features

- For applications of up to 800 Amps.
- All utility equipment is isolated in separated padlockable and sealable compartments.
- Separate customer compartment designed to hold distribution and control equipment.
- Designed with a deadfront panel.
- Optional mounting base is available.
- Optional construction in steel, aluminum and stainless steel.
- Powder coating is available in a variety of Milbank stock or custom colors.

Note

- May require customization based on regional requirements.

Slimline Commercial Pedestals

53

Provides a sleeker, smaller footprint, with wireway access on the side of the unit rather than the back, allowing maximum flexibility to place the pedestal anywhere physical space is at premium.

Providing unmetered AC power, distribution, surge suppression, mechanical interlock and stand-by generator receptacle — all in a neat, compact pedestal.

Features

- Available in either 100 or 200 Amps.
- Vandal-resistant and secure with an attractive design.
- Customer compartment with distribution and control equipment with swing deadfront door, secured with both a hasp/latch and draw latch outer door.
- Utility metering compartment protected with a hinged hood, increasing resistance to meter vandalism.
- Slimline pedestals have a smaller footprint by design.
- Wireway located on left side of pedestal for utility incoming wire, allowing pedestal to be mounted with back as close as 14" to walls or structures.
- Available in 12" and 20" widths and 50" and 63" (metered) and 43" (unmetered) heights.
- Includes a print pocket for plans and drawings.
- Voltage range is from 120V to 480V.
- Compatible with both ringless and ring-type meter sockets, 4–7 terminals.
- Available in a wide array of colors, including but not limited too all ANSI powder coated paint colors upon request.
- Pedestal mounting base option saves time and labor to install on a cement pad—no anchor bolts required.
- Powder coated G90 galvanized steel or aluminum; raw, anodized or powder coated, as well as stainless steel exterior options.

Note

- May require customization based on regional requirements.

Direct bury bases offer many advantages. With no need to coordinate, buy or wait for concrete, installation time can be cut down to less than an hour. Traditional direct bury pedestals are awkward to transport and handle and can only be used in a direct bury application. Milbank's modular design offers flexibility and convenience for distributors

and contractors alike. It's constructed with 14-gauge steel and only available for 12-inch pedestals.

Constructed with 14-gauge steel, available only for 12" pedestals.

61 - 65	.33	141 - 158

Overall ampere ratings of U/L listed Milbank multiple position meter sockets are based on 2008 N.E.C. Handbook Article 220-84 and ANSI / UL-414 (except where restricted by line connector size). These requirements provide for a diversity factor / demand factor being utilized in determining the overall (main bus / lug) rating of a gang socket. All Milbank U/L listed gang sockets meet or exceed these diversity factor/demand and factor requirements. Standard overall ampacity ratings for U/L listed and non U/L listed gang sockets are as shown in the chart below. Ampere ratings of meter sockets are based on the meter socket being wired with 75° C insulated wire conductor, sized in accordance with Table 310-16 of the National Electric Code.

GANG SOCKET OVERALL AMPACITIES

# of Meter Pos.	100A/Pos. Ampacity	125A/Pos. Ampacity	150A/Pos. Ampacity	200A/Pos. Ampacity
2	200A	200A	200A	200A #
3	200A	225A	225A	270A
4	200A	250A	270A	360A
5	225A	285A	338A	450A
6	270A	330A	396A	528A

† Unless otherwise permitted elsewhere in the Code, the overcurrent protection for conductor types marked with an obelisk (†) shall not exceed 15 Amps for 14 AWG, 20 Amps for 12 AWG, and 30 Amps for 10 AWG copper; or 15 Amps for 12 AWG and 25 Amps for 10 AWG aluminum and copper-clad aluminum after any correction factors for ambient temperature and number of conductors have been applied.
Some constructions are rated at 400 Amps overall (1252). Contact your sales representative for more information. Refer to latest NEC Code or Local Codes for updated requirements.

Please consult serving utility for their requirements prior to ordering or installing, as specifications and approvals vary by utility, and may require local electrical inspector approval. All installations must be installed by a licensed electrician and must comply with all national and local codes, laws and regulations. Milbank reserves the right to make changes in specifications and features shown without notice or obligation.

Energization of Electrical Equipment

59

Important Information for Installers

Important Note

In addition to national and local electrical codes, many utilities have specific requirements for metering equipment. Always contact the serving utility for their specifications and requirements prior to ordering or installing Milbank meter mounting equipment.

Before Energizing

1. Give equipment a thorough visual examination to determine that:
 - a) No shipping or installation damage exists.
 - b) Proper clearances have been maintained.
 - c) All connections have been made.
 - d) Equipment is clean and dry.
2. Make a thorough examination to:
 - a) Verify tightness of all bolted connections (see table below).
 - b) Manually operate all circuit breakers, switches, relays, etc.
 - c) Check rigidity of all mountings, bus bars and components.
 - d) Use test equipment to check continuity of circuitry and integrity of insulation.
3. All switches and circuit breakers should be in the OFF position.
4. Verify that manual meter bypass (if applicable) is in non-bypass position.
5. Install cover and/or close doors.
6. If installation is not being energized at this time, follow "after-energizing" steps listed below. These steps will secure the installation in case of accidental energization.

When Energizing

1. Use caution and follow established safety procedures:
 - a) Wear safety apparel.
 - b) Use safety equipment.
 - c) Take action to prevent injury to yourself and others in the event of failure of the installation.
 - d) Take action to prevent/decrease damage to property in the event of failure of the installation.
 - e) If you are unsure how to safely energize the installation, get someone who is knowledgeable to do it.

After Energizing

1. Secure the installation:
 - a) To prevent accidental contact with energized parts, cover all openings with approved filler devices.
 - b) To prevent unauthorized access, secure all covers and/or doors with approved security devices.
 - c) Attach/post information to advise others of potential hazards associated with the installation.

Recommended Torque for General Applications*

Nominal Size	Joint Description		Head Type	Torque (Inch Lbs.)
	Screw	Nut		
10	Brass	Brass Nut or Extruded Hole	All	20-25 inch lbs.
10	Steel	Copper or Aluminum Busbar $\leq 1/8"$	All	25-30 inch lbs.
10	Steel	Steel Nut or Extruded Hole; CU or AL Busbar $> 1/8"$	All	30-35 inch lbs.
12	Steel	Aluminum Extruded Hole	All	30-35 inch lbs.
12	Steel	Steel Nut or Extruded Hole	All	40-50 inch lbs.
1/4	Steel	Aluminum Extruded Hole	All	40-50 inch lbs.
1/4	Steel	Steel Nut or Extruded Hole; CU or AL Busbar	All	50-60 inch lbs.
5/16	Steel	Aluminum Extruded Hole	Hex	60-70 inch lbs.
5/16	Steel	Steel Nut or Extruded Hole; CU or AL Busbar	Hex	100-150 inch lbs.
3/8	Steel	Steel Nut	Hex	150-200 inch lbs.
1/2	Steel	Steel Nut	Hex	200-250 inch lbs.

* Interior labels typically indicate the required torque for wire connectors and studs, and should be referenced first.
CU: Copper
AL: Aluminum

Please consult serving utility for their requirements prior to ordering or installing, as specifications and approvals vary by utility, and may require local electrical inspector approval. All installations must be installed by a licensed electrician and must comply with all national and local codes, laws and regulations. Materials

Steel Quality

The meter equipment listed in this catalog is made of galvanized steel (AISI* G90) to afford the best possible weather-resistance.
*American Iron and Steel Institute.

Steel Sheet

16-gauge, galvanized, sheet: 1 1/4 oz./ sq.ft. class zinc-coated. (AISI G90)
14-gauge, galvanized, sheet: 1 1/4 oz./ sq.ft. class zinc-coated.

Aluminum Extrusion

Wire-Terminal: Alloy; 6061-T6, Tin-plated for CU/AL wire.
Bus Bar: Alloy; 6101-O and 6063-O

Aluminum Sheet

3000 series aluminum sheet, H14, or 5052 series aluminum sheet, H32. Where applicable thicknesses range from .064-.125

Copper Sheet and Bus

Electrolytic copper with tin plating in most applications.

Insulating Materials

- In most units, support bases for current-carrying components are molded from fiberglass reinforced high-strength, track resistant, thermoset polyester molding compounds.
- Clear or black safety shields and polarity barriers are molded from high-strength, track resistant, polycarbonate molding compounds.
- Various sheet insulating materials, as appropriate for the application are utilized in the fabrication of flat, formed and punched component parts and barriers.

Finish

Process

Light gray state-of-the-art electrostatically applied powder paint offers a durable, non-fading finish. For further information concerning the chemical analysis of the weather-resistant finish, please contact the factory.

Metal Fasteners

Zinc-coated with a chromate dip.

Ratings and Compliance

Ratings and Compliance

All Milbank electrical enclosures in this catalog are rated "Type 3R Enclosure" unless specified otherwise on the product's page. All enclosures with a UL designation are constructed per the appropriate UL Standard and may be installed per the National Electric Code. UL procedure files associated with the UL Standards are listed as follows: Meter Sockets (UL 414, File E30202), Test Switches (UL 414, File E62531), Power Outlets (UL 231, File E90945), Panelboards (UL 67, File E32628) and Pullout Switches (UL 1429, File E133062). Additional standards are utilized as applicable: Meter Sockets (ANSI C12.7), Test Switches (ANSI C12.9) and Panelboards (NEMA PB-1).

Please consult serving utility for their requirements prior to ordering or installing, as specifications and approvals vary by utility, and may require local electrical inspector approval. All installations must be installed by a licensed electrician and must comply with all national and local codes, laws and regulations. Milbank reserves the right to make changes in specifications and features shown without notice or obligation.

Prewiring: If standard factory prewiring is required, refer to wiring diagrams on this page. Determine appropriate diagram and send a copy with order. If custom factory prewiring is required, specify on order. Be sure to include meter socket catalog number, test switch make and catalog number, meter form number and provide a copy of your wiring diagram.

Please consult serving utility for their requirements prior to ordering or installing, as specifications and approvals vary by utility, and may require local electrical inspector approval. All installations must be installed by a licensed electrician and must comply with all national and local codes, laws and regulations. Milbank reserves the right to make changes in specifications and features shown without notice or obligation.
