

EV Charging Explained

- Milbank is a pioneer in EV charging distribution pedestals. With the increased emphasis on electric vehicles and the need to build supporting infrastructure, Milbank has the custom power distribution solution to complete every project.

From small charging station installations to multi-unit fast-charge arrays, Milbank enclosed controls power your EV charging needs.

Level 2

Level 3 & DCFC

Voltage	240V	480V
Amperage	40-80 Amps	85-300 Amps
Phase	1Ø	3Ø
Charge Time	3.3 - 6.6 kW	3.3 - 6.6 kW
Milbank Products	Slimline Series A Series P Series	B Series R Series F Series

Level 2 infrastructure is growing exponentially thanks to grants from the latest Infrastructure Bill. Visit us and learn more about the quickly growing EV movement and how we are here to help at milbankworks.com.
