THE MILBANK DIFFERENCE

Milbank is a family-owned American manufacturer headquartered in Kansas City, Mo. Since 1927, Milbank has set the standard for high quality metering equipment and enclosures. Milbank's portfolio includes single position meter sockets, meter combos, heavy duty and instrument rated metering, RV/mobile home pedestals, terminal/tap boxes, A/C disconnects, enclosures and a wide variety of enclosed controls.

After

MILBANK ENCLOSED CONTROLS

Our weather-resistant electrical enclosures consist of a utility pull section with optional meter socket, and a customer section containing distribution and control equipment. Milbank enclosed controls are an attractive, secure, easy-to-install and cost-effective solution when underground remote site power distribution and control equipment is required, replacing unsightly and inefficient strut and backboard structures.

Before

NOTEWORTHY FEATURES

- Easy Installation
- UL Listed
- Safe and Secure
- NEMA 3R Enclosure
- Customization
- Metered or Non-metered

Anywhere underground power distribution is needed

UL LISTED AND UTILITY APPROVED

All individual components included inside Milbank enclosed controls are covered under the UL508A listing. Utilities across the country are approving the NEMA 3R enclosures as they move toward a safer, more appealing solution for power distribution. We have various designs that satisfy most utilities' requirements.

Approved by utilities nationwide

All your power distribution needs in one enclosure

MULTIPLE SIZES AVAILABLE

Milbank offers multiple sizes to fit the needs of small and large applications. With three categories of sizes that can include numerous configurations for distribution, we have a solution for your project. Our enclosed controls specialists will help you choose the right size for your application.

TIME-SAVINGS

Don't waste time shopping for individual components or mounting separate pieces to backboards in the field! Milbank enclosed controls have traditionally been mounted on a concrete pad; however, newer designs allow for wall- or pole-mounting and some pedestals even offer a direct bury option. Several units can be installed in less than one hour.

CITYSCAPES OR GREEN SPACES

With custom colors, finishes, sizes and mounting options, Milbank enclosed controls can blend into any cityscape or park setting.

BENEFITS

Time is money. Save both with enclosed controls that can install in half the time of a typical strut and backboard system.

With all internal components covered under one UL listing, why spec anything else?

Meter hoods, internal deadfronts and external locking mechanisms are used to keep the pedestal safe from theft or tampering and keep bystanders safe from live electrical parts.

Utilities appreciate the separate, secure pull section with an option for metering that allows customers to plug in without disturbing the service into the enclosure.

ENCLOSED CONTROLS COMMON APPLICATIONS

Municipal Power

Communications

Outdoor Lighting

Site Power

Motor Control

Designs driven by customer needs

Minimal space

FIT YOUR LOCATION

Milbank enclosed controls are designed with space in mind. Let our enclosed controls specialists work with you to determine the best solution for your location.

Pre-existing base

Mounting options include:

- Pad-mount: Available for all pedestal sizes
- Wall- and pole-mount: When concrete is not available or ground clearance is required
- Direct bury: When concrete is not desired; ideal for park or landscape installations

No concrete

Customized to meet individual needs

SUMMERLAND GRAY

FINISHES

Milbank typically finishes products with powder-coated paint for galvanized steel and aluminum enclosures and also offers a stainless steel option. Our new anodized aluminum paint process provides a more environmentally friendly and more consistent finish.

**Additional colors are available at the customer's request. Please note: any deviation from standardized colors can affect the overall price and manufacturing time.*
