# Pedestals and Components

Milbank Express (ME) pedestals are part of Milbank’s enclosed controls line that are designed to be modular, off-the-shelf solutions for simple lighting, traffic, EV and general distribution applications. Milbank Express products are available with exposed and covered meter enclosures, with a wide variety of socket configurations to meet local utility requirements. Additional components such as breakers, contactors and time clocks can be sourced through Milbank or purchased through a local distributor. Please confirm with serving utility, and governing agency if applicable, to ensure their acceptance of this product configuration prior to purchase. Milbank personnel and representatives are available to help select correct configurations should you need assistance.
