

## MILBANK

ENERGYATWロRK

Meter Mounting Equipment

Milbank designs and manufactures electrical solutions that move and manage power for the residential， commercial，industrial，utility and transportation sectors．With more than 90 years of expertise in electrical engineering design and manufacturing，Milbank＇s portfolio includes metering equipment，enclosures and enclosed controls．Founded in 1927，Milbank is a family－owned，American manufacturer headquartered in Kansas City，Mo．For more information，please visit milbankworks．com．

## METERING

As a market leader in electrical metering equipment，Milbank has set the standard for quality since 1927．Hundreds of configurations are available，including many sizes，knockout configurations，terminal configurations，bypass options， hubs，locks and connectors．Milbank has the socket you need with thousands of active products to meet your utility＇s requirements．

## ENCLロSபRES

Milbank＇s line of enclosures include commercial junction boxes， panel mount enclosures，transformer cabinets，wireway and troughs．Built with high－quality craftsmanship and materials which meet or exceed industry standards，Milbank enclosures are made to protect controls and equipment from dust， dirt and other harmful elements found in a wide variety of environments based on various NEMA ratings Milbank offers．

## ENCLロSED CロNTRロLS

Milbank doesn＇t just build empty enclosures．We can deliver the entire package，complete with custom control equipment built to your exact specifications by our engineers．Milbank enclosed controls are an attractive，secure，easy to install and cost－effective solution when underground remote site power distribution and control equipment is required，replacing unsightly and inefficient strut and backboard structures．

## Air Conditioner Disconnects

## 30-60 Amps

U3802

U3812

U3832

Milbank's air conditioner disconnect has a removable hinged cover for ease of installation. Our compact design meets NEC wiring space requirements and also complies with NEC article 440-14. For safe working conditions, our disconnect pullers may be removed and reinstalled in the OFF position. Additionally, padlock provisions are included on the front cover. As with other Milbank products, our enclosure is constructed of G90U galvanized steel and electrostatically finished with an attractive, light gray, baked powder coating. Our epoxy/polyester resin blend offers a finish that is both durable and fade-resistant.

## Notes

- UL listed as Enclosed Pullout Switch
- Type 3R
- Weather resistant
- One-inch concentric knockouts utility, and may require local electrical inspector approval. All installations must be installed by a licensed electrician and must comply with all national and local codes, laws and regulations. Milbank reserves the right to make changes in specifications and features shown without notice or obligation.

## Air Conditioner Disconnects

## U3822-20GWR

## Specifications

- Meets NEC \#210.63 requirements
- UL listed as Power Outlet
- Type 3R enclosure
- In-use cover*
- Duplex ground connector
- 1 " concentric knockouts
- $1 \varnothing, 240$ volt
- 60 Amps, non-fused
- 20 Amps GFCI receptacle
- Reset/test button
- Weather and tamper resistant
- Meets NEC \#406.8 requirements

60 Amps | 10, 240 VAC | Air Conditioner Disconnect with GFCI Receptacle

| Catalog <br> Number | Type | $\begin{aligned} & \text { Max } \\ & \text { H.P. } \end{aligned}$ | Weight (lbs.) | Line/Load Wire Range |  | Ground Wire Range CU/AL | Dimensions |  |  | Wire Rating |  |

## Notes

－Hubs：For proper hub selection，see the hub suffix chart on the accessory page．
－Connectors：Extruded aluminum connectors are tin plated．
－Bypass：The lever on the U3278 unit operates the bypass device only；it does not provide clamping action on the meter spades．The levers on the U9551 and U9701 units supply clamping action on meter spades and also operate the bypass devices．
－Product numbers with BLG are used in AEP service areas．
＊Can be used in a 100 Amps 3 phase applications due to lug range．

## Notes

- AIC rating: 22K AIC standard.
- Breakers: For U5059 main breakers, order UQFPH-100, -150, or -200. For replacement main breaker in U4835 order Milbank UQFBH series
- -MLK: Main Lug feed-through kit K3701 factory installed.
- Fifth terminal: For field mounted fifth terminal order catalog number K3865.
- Connectors: Supplied with $3 / 8^{\prime \prime} \times 16$ hex head nuts with Belleville washers. For connector kits, order as extra K1540 (single 600 kcmil ). For twin lug connectors, order as extra $\mathbf{K} 1350$ (twin 350 kcmil ). The extra stud on line side is a wire stop.
- Product numbers with BLG are used in AEP service areas (Suffix -BLG is barrel lock with gaurd.)
* Barrel lock (suffix -BL)
- For replacement main breaker in U5890 order Siemens QN series QN2200H.
- For replacement main breaker in U5891, order QN2200H (for left breaker) and a QN2200RH (for right breaker).

Please consult serving utility for their requirements prior to ordering or installing, as specifications and approvals vary by utility, and may require local electrical inspector approval. All installations must be installed by a licensed electrician and must

## Notes

－Hubs：For proper hub selection，refer to the hub suffix chart on the accessories page．For the U1254－6 two hub openings are supplied and the extra opening is closed with a closing plate as standard．
－Fifth terminal：For field mounted fifth terminal，order catalog number K5T（9 o＇clock position）．
－Product numbers with BLG are used in AEP service areas．

## Notes

－Knockouts：See drawings on the next page．
－Optional：Factory installed breakers are available－consult factory．
－AIC Rating：All models are rated 22 K AIC when used with approved breakers rated at 22 K ．
－Hub：Units supplied with one（1）closing plate．Order hubs separately，see accesory page．
－Fifth Terminal：For field installed fifth terminal，order K5T．
－Connectors：Socket is supplied with $3 / 8^{\prime \prime}-16$ hex head nuts with Belleville washers．For connector lug kits，order as extra from chart on the accessories page．Separate lug kits are required for line and load．

## Notes

- Features: Supplied with solid back board when noted, three point locking handle, lift off hinges with stainless steel pins and padlock provisions.
- U5990-O: is $3 \varnothing$ with a 50 K RMS rating, and has a wire range of \#4-600 kcmil
- Units with U Prefix are UL listed.

[^8]MILBANK

## Multi-Position Tap Box

## Features

- Painted Aluminum Construction: Enclosure shells are constructed with lightweight aluminum, making wall-mount installations easier. Powder-coat paint finish helps prevent corrosion.
- Capable of Wall or Pad Mounting: Units feature a removable bottom, allowing an easy conversion from a wall-mount to a pad-mount.
- Smaller Footprint: The UAP6094 model has a more compact footprint compared with the leading competitor.
- Multi-port ground lugs
- Optional Pentabolt Secured Handle available (see pics below): Enclosure handle can be included with an optional pentabolt locking mechanism (see photos below) for enhanced protection.

## Common Applications

| Catalog Number | Phase | Position Lugs | Maximum Wire Size | Maximum Amperage | Dimensions |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  | D" | W" | H" |
| UAP6094-O | 3 | 16 | 500 kcmil | 3000 Amps | 16 | 255/8 | 43 |
| UAP6095-O | 3 | 22 | 500 kcmil | 4000 Amps | 16 | 323/8 | 43 |
| UAP6096-O | 3 | 14 | 750 kcmil | 3300 Amps | 16 | 2515/16 | 51 |

100－200 Amps｜ 4 Terminal｜Meter Main Pedestal｜Ringless

## Notes

－Parallel to series conversion：For field converting from parallel wired to series wired order K5194．
－Fifth terminal：For field installed fifth terminal，order K5T．
－Stabilizer foot：For field installed stabilizer foot，order K5415．
－Penta bolt locking：For field installed pedestal fronts penta bolt locking，order K5039．
－Receptacles：Consult factory for installed receptacle assemblies．
－Short circuit current rating：22K AIC．However，this rating is limited to the lowest interrupting capacity of any circuit breaker installed．Watthour meter not included in short circuit current rating．
－Receptacle Bridge is ordered separately on part\＃K5400－BRIDGE－2POS．
－Contact factory for receptacle configurations available．
－Pedestals with－10GR suffix include a 20 Amps GFI receptacle．

## Notes

- Breakers: Supplied from factory with 2 double-pole, Milbank UQFB or UQFBH ( 22 K AIC) bolt-on circuit breakers.
- Connectors: The line wire section is supplied with $3 / 8^{\prime \prime}-16$ studs with hex nuts and captive Bellville washers. For line side connectors, order as extra catalog numbers K1539 (single-350 kcmil), or K1540 (single-600 kcmil), or for twin K1350 (twin350 kcmil). Order one kit per unit.
- Extension kit: For extension kit, order as extra catalog number S1848.
- Bypass: Lever supplies clamping action on meter spades and also operates bypass device.
- Short circuit current rating: These units are rated 22K AIC. However, this rating is limited to the lowest interrupting capacity of any circuit breaker installed. Watthour meter not included in short circuit current rating.

## Enclosed Controls

## Milbank Enclosed Controls are pad－

 mounted，weather resistant electrical enclosures consisting of a utility pull section with optional meter socket，and a customer section containing distribution and control equipment．Commercial pedestals are an attractive，secure，easy to install and cost－effective solution when underground remote site power distribution and control equipment is required，replacing unsightly and inefficient strut and backboard

Strut and backboard

Commercial pedestal structures．

## UL Listed as Industrial Control Equipment（File E113855）

## Standard Features

－Type 3R rain－resistant，vandal－resistant cabinet of polyurethane powder coated steel（aluminum or stainless steel also available）
－UL listed as enclosed industrial control equipment（UL508A）
－Isolated lockable and sealable utility metering and lug landing sections
－Lockable customer section for distribution and control equipment with internal deadfront
－Print pocket inside customer section door contains wiring schematics and installation instructions
－Load centers are UL listed for use with various manufacturers＇circuit breakers
－All stainless steel external hardware（screws，bolts，hinges， handles，hasps and sealing screws）

[^18]

## Applications

These units are ideal for controlling and metering:

- Traffic signals
- Street lighting
- Power distribution for electronic vehicle charging stations
- Communication equipment such as cell towers and telephone vaults
- Event power for fairgrounds, swap meets, outdoor markets, portable offices, holiday lights, etc.
- Outdoor lighting for athletic fields, tennis and basketball courts, parking lots, landscaping and subdivision entrances, etc.

## Available Factory-Installed Options

- Meter sockets: ring type or ringless, up to 400 Amps
- Main and branch breakers or T fuses
- Distribution: copper load centers and panel boards
- Clocks, timers and relays
- Photoelectric cells and controls
- Various power receptacles: pin and sleeve, twist lock or straight blade
- Contactors: lighting, definite purpose, motor starters
- Surge protection and lightning arrestors
- Generator inlets with interlocked breakers
- Push button controls
- Thermostat controls, fans and heating strips
- Power blocks and terminal blocks
- Steel, aluminum and plywood backboards
- Transformers
- Interlock devices for circuit breakers

## Options

- Available in steel, aluminum (raw painted or anodized) or stainless steel construction with powder coated finish available in eight standard colors or special-ordered RAL colors
- Available for applications up to $400 \mathrm{Amps}, 120 \mathrm{~V}, 208 \mathrm{~V}, 240 \mathrm{~V}, 277 \mathrm{~V}$, 480V-1Ø or 3Ø

Padmount bases available for all pedestal sizes, inquire with your representative for details

## CP-ABK5/8

Anchor bolt kit
(includes four 5/8-13
$\times 18$ " anchor bolts

## 105J

Fifth terminal kit for use with ring type meter sockets

## K3865

Fifth terminal kit for use with ringless meter sockets

## CP-TC7D

7-day time clock kit

CP-TC24H
24-hour time clock kit CP-TCWIRE
Male 4-pin connector and wiring harness for use with time clocks other than above

CP-PE-HOA-3POS
HOA switch for field installation

Please consult serving utility for their requirements prior to ordering or installing, as specifications and approvals vary by utility, and may require local electrical inspector approval. All installations must be installed by a licensed electrician and must comply with all national and local codes, laws and regulations. Milbank reserves the right to make changes in specifications

## Enclosed Controls

## Surface-Mount Commercial Pedestal

Originally developed for small cellular communications, the surfacemount enclosed control offers the flexibility of larger enclosed

- Multiple bypass options available
- Monitoring options available
- Can be powder coated in any Milbank standard EC colors or custom colors.

Benefits

- Does not take up sidewalk space
- Flood resistant
- Eliminates need for connecting components - Wire in - Wire Out

# Main Load Center Commercial Pedestal 

$1 \varnothing 3$ wire 120/240V or 208Y/120V
Application: remote site service for multiple loads
Milbank Main Load Center Commercial Pedestals are designed to handle the vast majority of all requirements in a standard, stocked configuration.

- All units feature a load center with a plug-on, back-fed main breaker.
- Standard units are equipped with with a 16 circuit load center in the 100 Amps or 24 circuit load center in 200 Amps models
- Sub-feed lugs to allow feeding an external panel.

If your application requires turning loads on based on "dusk-to-dawn" requirements, be sure to see the Milbank Switched Load Center Commercial Pedestal products on the following page.

## Features

These units include everything required for remote site service:

- Expandable: load centers allow for future expansion without costly modifications.
- All units feature a 200 Amps meter socket with optional fieldinstallable fifth terminal kit available.
- 22K Amps interrupting capacity (AIC) standard.
- Optional mounting base can be embedded in concrete for fast, easy installation.
- Separate sealable and lockable utility termination section.
- Separate sealable and lockable metering section.
- Separate sealable and lockable customer section with a load center
 for "always on" loads that include a main circuit breaker, 20 (125 or 200 Amps model) or 14 (100 Amps model) blank breaker spaces and a circuit directory to document configuration.

Please consult serving utility for their requirements prior to ordering or installing, as specifications and approvals vary by utility, and may require local electrical inspector approval. All installations must be installed by a licensed electrician and must comply with all national and local codes, laws and regulations. Milbank reserves the right to make changes in specifications

## Enclosed Controls

## Switched Load Center Commercial Pedestals

$1 \varnothing 3$ wire $120 / 240 \mathrm{~V}$ or $208 \mathrm{Y} / 120 \mathrm{~V}$
Designed not only to provide power for various loads, but also to switch specific loads on and off under certain conditions. A photoelectric cell is used for these controlled loads, and an optional time clock is also available.

## Features

These units include everything required for remote site service:

- Expandable: load centers allow for future expansion without costly modifications.
- All units feature a 200 Amps meter socket with optional field-installable fifth terminal kit available.
- 22 K Amps interrupting capacity (AIC) standard.
- Optional mounting base can be embedded in concrete for fast, easy installation.
- Separate sealable and lockable utility termination section.
- Separate sealable and lockable metering section.
- Separate sealable and lockable customer section with a control circuit including PE receptacle, Lexan® window, glare shield, Hand-Off-Auto (HOA) switch, contractor controlling a 16 -circuit load center for controlled loads, a premounted DIN rail and pre-wired connector to add an optional "plug-and-play" time clock kit for PE on and TC off operation and a circuit directory to document configuration.
- A load center for "always on" loads that includes a main circuit breaker, a control power circuit breaker, a switched load center main breaker, nine (125 or 200 Amps model) or 11 (100 Amps model) blank breaker spaces and a circuit directory to document configuration.

Commercial Job Sites

Remote Site for Residential \& Commercial Job Sites

## Enclosed Controls <br> Commercial Pedestals

Designed to provide a weather and vandal resistant metered enclosure for various loads and distribution. Each pedestal has been designed to handle a wide range of applications using standard, stocked configurations.

- Choice of a single main breaker or twin service disconnect breakers gives flexibility to the pedestal design.
- Optional distribution with feed-through lugs below the service disconnect breakers allows the pedestal to handle numerous applications.
- Typical applications include remote homes where the metering is best located at the curb side or other remote area. The pedestal can also provide power to secondary residence, on-site business, workshop, irrigation, lighting, security or other secondary load.
- Refer to page 18 for color options

## Features

These units include everything required for remote service:

- Main circuit breaker or dual service disconnects
- Expandable: load center units allow for future expansion without costly modifications
- Optional mounting base can be embedded in concrete for fast, easy installation
- Separate sealable and lockable utility termination section with lug termination
- Separate sealable and lockable metering section
- A separate sealable and lockable customer section with a circuit directory and a print pocket to hold all documentation
- Meter socket options include ring type with bypass studs, ringless with heavy duty lever bypass, or K-Type bolt-on

Please consult serving utility for their requirements prior to ordering or installing, as specifications and approvals vary by utility, and may require local electrical inspector approval. All installations must be installed by a licensed electrician and must comply with all national and local codes, laws and regulations. Milbank reserves the right to make changes in specifications

Designed to provide battery backup power for various loads, and to switch specific loads on and off under certain conditions; a photoelectric cell or time clock to control lighting circuits, as an example. Metered and unmetered power distribution options are available. The back-up power pedestal is designed to handle the vast majority of todays back-up power requirements. By using a 19" rack design, shelves can be adjusted to accommodate the required batteries and manufactures DC to AC inverters, transfer switches and other related equipment. This design gives the user a wide range of design and configuration options. Complete turnkey, ready to power-up pedestals are offered along with basic units ready to accept batteries and inverters supplied by others.

## Features

- 100 through 320 Amps meter socket with the option of either a ring type socket (conforms to EUSERC 308) with or without test/ bypass blocks or a heavy duty ringless socket with lever bypass
- Separate sealable utility termination compartment
- An isolated separate customer section with service disconnects, power distribution options and power control
- 19 " wide rack in customer compartment for easy layout of equipment
- Battery trays
- Thermostat with cooling fan
- Filtered louvers for heat rise flow through ventilation
- Three point door latch (key or pad lockable)

## Note

- May require customization based on regional requirements

Traffic Signals

Communications
Power Distribution

Parking Lots

## Options

- Manual bypass switch
- Transfer switch for generator power back-up
- Generator inlet receptacles 30 Amps through 200 Amps
- Pad lockable provision for receptacles
- Police access door
- Metered load center distribution
- Unmetered load center distribution
- Photo electric controls (for street lighting)
- Time clocks
- HOA switches
- Contactors
- GFI duplex receptacles
- Thermostat for heating control
- Heating pads or elements
- Roll out shelves for batteries
- Surge arrestors and lighting arrestors

Providing metered or unmetered AC power, distribution, surge suppression, mechanical interlock and stand-by generator receptacle - all in a neat, compact pedestal.

## Features

- 120/240V 1Ø3W through 277/480V 3Ø4W ratings
- Metered or unmetered units
- Choice of EUSERC ring type or ringless meter sockets
- 60 Amps through 400 Amps ratings
- Pad lockable, isolated utility compartments
- 20 Amps GFCI convenience receptacle
- Lockable recessed generator receptacle door
- Utility and generator indicator light options
- All stainless steel hardware
- Galvanized steel, aluminum or stainless steel cabinet options
- Custom designs available

## Note

- May require customization based on regional requirements

Electric Vechicle Charging Stations

[^19]MILBANK

Provides a sleeker, smaller footprint, with wireway access on the side of the unit rather than the back, allowing maximum flexibility to place the pedestal anywhere physical space is at premium.

Providing unmetered AC power, distribution, surge suppression, mechanical interlock and stand-by generator receptacle - all in a neat, compact pedestal.

## Features

- 100 or 200 Amps
- Vandal-resistant, secure and attractive design
- Customer compartment with distribution and control equipment with swing dead front door, secured with both a hasp/latch and draw latch outer door
- Utility metering compartment protected with a hinged hood, increasing resistance to meter vandalism
- Small footprint
- Wireway located on left side of pedestal for utility incoming wire, allowing pedestal to be mounted with back as close as $14^{\prime \prime}$ to walls or structures
- Available in $12^{\prime \prime}$ and 20 " widths and 50 " and $63^{\prime \prime}$ (metered) and $43^{\prime \prime}$ (unmetered) heights
- Includes a print pocket for plans and drawings
- Voltage range: 120V-480V
- Compatible with both ringless and ring type meter sockets, 4-7 terminals
- Available in a wide array of colors, including but not limited too all ANSI powder coated paint colors upon request
- Pedestal mounting base option saves time and labor to install on a cement pad-no anchor bolts required
- Powder coated G90 galvanized steel or Aluminum; raw, annodized or powder coated, as well as stainless steel exterior options

## Note

- May require customization based on regional requirements

Parks \& Landscaping

Direct bury pedestals offer many advantages. With no need to coordinate, buy or wait for concrete, installation time can be cut down to less than an hour. Traditional direct bury pedestals are awkward to transport and handle and can only be used in a direct bury application. Milbank's modular design offers flexibility and convenience for distributors

and contractors alike. It's constructed with 14 guage steel and only available for 12" pedestals. utility, and may require local electrical inspector approval. All installations must be installed by a licensed electrician and must comply with all national and local codes, laws and regulations. Milbank reserves the right to make changes in specifications

Please consult serving utility for their requirements prior to ordering or installing, as specifications and approvals vary by utility, and may require local electrical inspector approval. (Per NEC table 310-16)
Overall ampere ratings of U/L listed Milbank multiple position meter sockets are based on 2008 N.E.C. Handbook Article 220-84 and ANSI / UL-414 (except where restricted by line connector size.) These requirements provide for a diversity factor / demand factor being utilized in determining the overall (main bus / lug) rating of a gang socket. All Milbank U/L listed gang sockets meet or exceed these diversity actor/demand and factor requirements. Standard overall ampacity ratings for U/L listed and non U/L listed gang sockets are as shown in the chart below. Ampere ratings of meter sockets are based on the meter

GANG SOCKET OVERALL AMPACITIES

| \# of Meter <br> Pos. | 100A/Pos. <br> Ampacity | 125A/Pos. <br> Ampacity | 150A/Pos. <br> Ampacity | 200A/Pos. <br> Ampacity |

| 3 | 200 A | 225 A | 225 A | 270 A |
| 4 | 200 A | 250 A | 270 A | 360 A |
| 5 | 225 A | 285 A | 338 A | 450 A |
| 6 | 270 A | 330 A | 396 A | 528 A |

$\dagger$ Unless otherwise permitted elsewhere in the Code, the overcurrent protection for conductor types marked with an obelisk ( $\dagger$ ) shall not exceed 15 amps for 14 AWG, 20 amps for 12 AWG, and 30 amps for 10 AWG copper: or 15 amps for 12 AWG and 25 amps for 10 AWG aluminum and copper-clad aluminum after any correction factors for ambient temperature and number of conductors have been applied. \# Some constructions are rated at 400 amps overall (1252). Contact your sales representative for more information. Refer to latest NEC Code or Local Codes for updated requirements.

# Energization of Electrical Equipment <br> Important Information for Installers 

## Important Note

In addition to national and local electrical codes, many utilities have specific requirements for metering equipment. Always consult the serving utility for their specifications and requirements prior to ordering or installing Milbank meter mounting equipment.

## Before Energizing

1. Give equipment a thorough visual examination to determine that:
A. No shipping or installation damage exists.
B. Proper clearances have been maintained.
C. All connections have been made.
D. Equipment is clean and dry.
2. Make a thorough examination to:
A. Verify tightness of all bolted connections (see table below).
B. Manually operate all circuit breakers, switches, relays, etc.
C. Check rigidity of all mountings, bus bars and components.
D. Use test equipment to check continuity of circuitry and integrity of insulation.
3. All switches and circuit breakers should be in the "off" position.
4. Verify that manual meter bypass (if applicable) is in non-bypass position.
5. Install cover and/or close doors.
6. If installation is not being energized at this time, follow "after-energizing" steps listed below. These steps will secure the installation in case of accidental energization.

## When Energizing

Use caution and follow established safety procedures:

1) Wear safety apparel.
2) Use safety equipment.
3) Take action to prevent injury to yourself and others in the event of failure of the installation.
4) Take action to prevent/decrease damage to property in the event of failure of the installation.
5) If you are unsure how to safely energize the installation, get someone who is knowledgeable to do it.

## After Energizing

Secure the installation:

1) To prevent accidental contact with energized parts, cover all openings with approved filler devices.
2) To prevent unauthorized access, secure all covers and/or doors with approved security devices.
3) Attach/post information to advise others of potential hazards associated with the installation.

## Recommended Torque for General Applications*

| Nominal Size | Joint Description |  | Head Type | Torque (Inch Lbs.) |
| :---: | :---: | :---: | :---: | :---: |
|  | Screw | Nut |  |  |
| 10 | Brass | Brass Nut or Extruded Hole | All | 20-25 inch lbs. |
| 10 | Steel | Copper or Aluminum Busbar $\leq 1 / 8{ }^{\prime \prime}$ | All | 25-30 inch lbs. |
| 10 | Steel | Steel Nut or Extruded Hole; CU or AL Busbar > 1/8" | All | $30-35$ inch lbs. |
| 12 | Steel | Aluminum Extruded Hole | All | $30-35$ inch lbs. |
| 12 | Steel | Steel Nut or Extruded Hole | All | $40-50$ inch lbs. |
| 1/4 | Steel | Aluminum Extruded Hole | All | $40-50$ inch lbs. |
| 1/4 | Steel | Steel Nut or Extruded Hole; CU or AL Busbar | All | $50-60$ inch lbs. |
| 5/16 | Steel | Aluminum Extruded Hole | Hex | 60-70 inch lbs. |
| 5/16 | Steel | Steel Nut or Extruded Hole; CU or AL Busbar | Hex | 100-150 inch lbs. |
| 3/8 | Steel | Steel Nut | Hex | 150-200 inch lbs. |
| 1/2 | Steel | Steel Nut | Hex | 200-250 inch lbs. |

* Interior labels typically indicate the required torque for wire connectors and studs, and should be referenced first.
CU: Copper
AL: Aluminum Please consult serving utility for their requirements prior to ordering or installing, as specifications and approvals vary by utility, and may require local electrical inspector approval. All installations must be installed by a licensed electrician and must comply with all national and local codes, laws and regulations. Milbank reserves the right to make changes in specifications
ENERGYAT WGRK

# Materials \& Finishes <br> Reference Information 

## Materials

## Steel Quality

The meter equipment listed in this catalog is made of galvanized steel (AISI* G90) to afford the best possible weather proofing. *American Iron and Steel Institute.

## Steel Sheet

16 gauge, galvanized, sheet: $11 / 4 \mathrm{oz} . /$ sq.ft. class zinc-coated. (AISI G90)
14 gauge, galvanized, sheet: 1 1/4 oz./ sq.ft. class zinc-coated.

## Aluminum Extrusion

Wire-Terminals: Alloy; 6061-T6, Tin-plated for CU/AL wire.
Bus Bar: Alloy; 6101-O \& 6063-O

## Aluminum Sheet

3000 series aluminum sheet, H 14 , or 5052 series aluminum sheet, H 32 . Where applicable thicknesses range from . $064-125$

## Copper Sheet \& Bus

Electrolytic copper with tin plating in most applications.

## Insulating Materials

- In most units, support bases for current-carrying components are molded from fiberglass reinforced high-strength, track resistant, thermoset polyester molding compounds.
- Clear or black safety shields and polarity barriers are molded from high-strength, track resistant, polycarbonate molding compounds.
- Various sheet insulating materials, as appropriate for the application are utilized in the fabrication of flat, formed and punched component parts and barriers.

## Finish

## Process

Light gray state-of-the-art electrostatically applied powder paint offers a durable, non-fading finish. For further information concerning the chemical analysis of the weather resistant finish, please contact the factory.

## Metal Fastners

Zinc-coated with a chromate dip.

## Ratings \& Compliance

## Ratings \& Compliance

All Milbank electrical enclosures in this catalog are rated "Type 3R Enclosure" unless specified otherwise on the product's page. All enclosures with a UL designation are constructed per the appropriate UL Standard and may be installed per the National Electric Code. UL procedure files associated with the UL Standards are listed as follows: Meter Sockets (UL 414, File E30202), Test Switches (UL 414, File E62531), Power Outlets (UL 231, File E90945), Panelboards (UL 67, File E32628) and Pullout Switches (UL 1429, File E133062). Additional standards are utilized as applicable: Meter Sockets (ANSI C12.7), Test Switches (ANSI C12.9) and Panelboards (NEMA PB-1).
